**WIRECOM Technologies appoints
Vincent MOURET as CEO**

Olivet - France, March 23rd, 2009

WIRECOM Technologies, a provider of solutions for energy savings, announces appointment of Vincent MOURET as Chief Executive Officer. ALLARD Thierry, President and Founder of WIRECOM Technologies welcomes his arrival:

"We have known a fast growth during the last two years; WIRECOM Technologies will now accelerate its development and internationalization. Vincent's experience will naturally contribute to this evolution."

Vincent MOURET was previously CEO of Let It Wave, French semiconductors start-up specialized in the development of video processors (sold in June 2008 to Zoran NASDAQ ZRAN).

Before that, Vincent was Director of Nemerix, start-up in Switzerland expert in GPS components, and he also led the departments of marketing and R&D of Wavecom (NASDAQ: WVCM).

Previously, he held several management positions at Alcatel Microelectronics, Motorola Semiconductors and Texas Instruments, where he has built a broad international management experience. Vincent holds a degree in Electronics Engineering from the University of Paris VI (France).

"I am delighted to join the WIRECOM Technologies team. Its innovative solutions of Energy Demand Management ensure a significant growth potential. Being able to contribute to its success is an opportunity that immediately attracted me."

About WIRECOM Technologies

WIRECOM Technologies, a specialist in energy demands management, develops and designs solutions for optimizing energy consumptions in buildings and their equipments: the intelligent system composed of electronic modules brings communication between the various appliances through the electrical grid.

It provides savings of 20% to 50% on energy bills and contributes to the fight against global warming.

With its experience in Building Management Systems (BMS) and its technological edge, WIRECOM Technologies also offers an OEM range directly integrated into devices and solutions for energy suppliers and telecommunications.

International deployment will be logically intensified in the coming months.
